Professional Summary

Computer Science student with a strong interest in Cybersecurity, Web Application Security, and Mobile Security. Hands-on experience with Kali Linux, Burp Suite, Nmap, Wireshark, Metasploit Framework, and GoPhish. Completed professional training programs through MCIT and NTI. Currently developing practical skills in Web Penetration Testing, Mobile Penetration Testing, Network Security, and Vulnerability Assessment.

Education

Bachelor of Computer Science — Expected 2027
Akhbar El Youm Academy, Egypt
Overall Grade: Very Good

Training & Experience

National Telecommunication Institute (NTI)
Penetration Testing Trainee | Aug 2025 – Sep 2025

Ministry of Communications and Information Technology (MCIT)
Summer Training Program | 2025

Technical Skills

- Networking Fundamentals (TCP/IP, DNS, HTTP/HTTPS)
- Linux, Kali Linux, Windows
- Web Security Fundamentals & OWASP Top 10
- Mobile Security Fundamentals
- Burp Suite, Nmap, Wireshark, Metasploit
- GoPhish
- Vulnerability Assessment & Security Testing Basics

Projects & Practical Experience

Phishing Simulation – GoPhish
Set up and conducted controlled phishing simulations using GoPhish. Configured phishing campaigns, prepared email templates and landing pages, monitored campaign results, and analyzed user interactions.

Web Security Testing – OWASP Top 10 & Burp Suite
Performed hands-on web security testing in controlled lab environments. Intercepted and analyzed HTTP requests using Burp Suite, tested applications for OWASP Top 10 vulnerabilities, and documented security findings and their potential impact.

Mobile Application Security Testing
Conducted security assessments of mobile applications in lab environments, focusing on insecure data storage, weak authentication mechanisms, and insecure communication. Analyzed identified security issues and their potential impact.

Network Security & Analysis
Used Kali Linux, Metasploit, Wireshark, and other network analysis tools for hands-on security testing and traffic analysis. Captured and analyzed network packets, investigated communication patterns, and practiced identifying potential security issues in controlled environments.

Currently Learning

- Web Penetration Testing
- Mobile Penetration Testing
- Network Security
- Advanced Offensive Security Concepts
